iStudy! User Manual

iStudy!   HOME   FLASHCARDS   MATH QUIZ   DICTIONARY   <u>Logout</u>

Are you ready to study?

Need to refresh your memory?

From making your own flashcards to quizzes, you'll be preped for your next test!

Introduction

Welcome to iStudy!, a web app designed to help you… well you guessed it, study! There are several features in our application that are meant to build and refine your knowledge. The 3 features we offer are (1) the ability to create FlashCards!, (2) a Dictionary! with access to over 180,000 words in the English language, and (3) a randomly generated Math Quiz. This manual will guide you through the usage of iStudy!'s features.

Logging In

The very first page when entering iStudy! will require you to log in to an account. If you do not have an account, simply register your username and password with the "Register Here" button. When you log in, you will be sent to our home page.

Accessing The Home Page

On iStudy!'s home page, you will be able to access our 3 features on the bar located at the top. All you need to do is click the name of whichever feature you want to use. If you need to go back to the home page, you can click the home button or our iStudy! logo to redirect you. You may logout using the logout button located on the top bar in the right corner.

FlashCards!

When on the FlashCards! page, you may create your very own set of flashcards. To begin, simply click the "Add Card!" button and enter your

question and answer in the appropriate boxes. Once you are done, click the "Save Flashcard!" button to store your flashcard at the bottom. Your question will be displayed on its respective card and the answer will be hidden until you click the card once. To hide the answer click the card again once. A fast double-click will delete your card for easy clean ups. You may click the "x" on the flashcard creation panel to minimize it for a sleek studying area.

Math Quiz

When on the Math Quiz page, you may begin answering questions by clicking the "Next" button. Each click of the "Next" button will generate you a random math problem, in which you can type your answer in the bar. When you have your answer, you can use the "Check Answer" button to evaluate it, while we keep score at the bottom. If you are having trouble with a problem, you can either click "Show Answer" to see the solution or move on to another question by clicking "Next".

Dictionary!

When on the Dictionary! page, you will be able to search for words in the English language. Simply type the word you are searching for in the "Search here!" bar and click submit or enter on your keyboard. You will see your word, its part of speech, and its definition neatly labeled below. If you wish to reset your search, click the "reset" button, but it is not necessary if you want to keep searching words. If you want to clear the search bar because of a typo or for whatever reason, you can hover over the search bar and click the "x" to do so.
